## Summary

**Product designer with ten years in health and mobility apps.** I build design systems that let squads ship consistent screens faster, and I back every big change with research: interviews, usability tests and the numbers after launch.

## Experience

**Kanaya Health** Senior Product Designer, Design Systems (Jakarta) Mar 2022 – Present

- Lead the Lentera design system: 140 components and tokens used by 9 squads on web, iOS and Android.
- Cut design-to-build time for new screens by 38% and halved UI defects caught in QA.
- Redesigned telemedicine booking after 30 patient interviews; completed bookings rose from 61% to 79%.

**Lajur** Product Designer (Jakarta) Jul 2019 – Feb 2022

- Designed the partner app for 45,000 motorbike drivers; tested every release with drivers at three hubs.
- Simplified the in-app wallet top-up; payment support tickets fell by 27%.

**Studio Piksel Sembilan** UI/UX Designer (Jakarta) Aug 2016 – Jun 2019

- Designed websites and apps for 20+ clients in retail, banking and education.

## Projects

**Lentera Design System** 2022 – 2025

Tokens, a Figma library and a React kit with docs; adopted by 9 squads, up from 2, in 18 months.

**Clinic booking for older patients** 2024

Field research with 24 patients over 60; larger type and voice prompts doubled their completed bookings.

## Education

**Universitas Bina Nusantara** Visual Communication Design (Bachelor of Design) 2012 – 2016

GPA 3.62 • Jakarta

## Skills

**Design**

Design systems, Interaction design, Prototyping, Accessibility

**Research**

Interviews, Usability testing, Diary studies

**Tools**

Figma, Tokens Studio, Storybook, Maze

## Awards

Gold, Digital Health Product 2024
Nusantara Digital Design Awards

Finalist, Inclusive Design Challenge 2023
Forum Desain Inklusif Asia
